INQUIRY INTO WINDSOR BRIDGE REPLACEMENT PROJECT

Name: Ms Jenny Fay

Date received: 31 December 2017

I would like to see the Windsor Bridge replacement project stopped immediately. This project will not solve any traffic or flood issues. All it will do is destroy Australia's oldest Town Square. Why has no effort been made to explain why this destructive plan is better than building a bypass? Many other towns have bypasses; and these towns are thriving.

If Windsor had a bypass the trucks would not be rumbling through Thompson Square. The current Windsor Bridge could still be used for local traffic, and those not stopping (like trucks) could travel to their destination on the bypass.

Bypasses are safer and more efficient for trucks. They also improve safety, air quality and noise levels for the town.

I would like to recommend that all work on the Windsor Bridge replacement project cease immediately and that the RMS begin plans for a Windsor Bypass.
