

**INQUIRY INTO WINDSOR BRIDGE REPLACEMENT
PROJECT**

Name: Mr Rodney Cook

Date received: 22 January 2018

Thompson square is the most significant area in Windsor , the destruction being done on a daily basis is criminal . Anyone who does any research into this area will soon understand why it is an important link to Australian colonial history . The kind of madness being forced upon the citizens is unthinkable .The new bridge proposed is not a traffic solution as stated by RMS The loss of such an important area is after Dom Perriot just secured 3 million for tourism for the area to double overnight visitors over the next 3years is something of a B grade comedy . Come to see the destruction of History a great selling point for tourism A flood free Bypass is what is required . The area should have been listed a long time ago as it the birthplace of a Fair go ! Our Forefathers will be turning in their graves .Please get to the bottom of the sneaky deals and backroom handshakes that seem to have this project already built ! The daily Telegraph stated that the RMS have started work on the footings ? Is this the unskilled archaeology being done at present . It appears the are very unskilled and immune to asbestos ! constantly damaging convict bricks ,plates ,bottles . Not wearing protective breathing equipment with all the dangerous asbestos about .cop out to destroy items . Good luck with your honest research into this waste of money of a project that has no budget as stated by sitting MP quote - it is going to be built no matter the cost .
