## **INQUIRY INTO WINDSOR BRIDGE REPLACEMENT PROJECT**

**Name:** Mrs Christine Cook

**Date received:** 24 January 2018

---

Please accept this correspondence as my submission in respect to the Windsor Bridge Inquiry. While making my submission I wish to register my opposition and objection to the Governments proposal to build this new bridge 35m downstream of the existing Historical Bridge. From the information I have read I believe it will make little difference in making traffic flow better or in future flooding as confirmed in Project EIS.

From the start I have been extremely disappointed that strong objections along with proof have been ignored by a Government that is determined just to get the job done and their only reason being 'recognition that the job got completed'. I have been a resident of this community for 27 years and have had to travel via the Windsor Bridge at least 5-6 of those days over this bridge to get to work and any social events. Traffic has increased dramatically and the trucks are getting bigger so I would ask that instead of knocking this historical bridge down to please build a BYPASS further downstream allowing people to enjoy the town of Windsor without massive trucks rumbling through what should be a peaceful day out in Thompson Square.
