

INQUIRY INTO WINDSOR BRIDGE REPLACEMENT PROJECT

Name: Ms Vicky Russell

Date received: 28 January 2018

Windsor needs a bypass not a replacement bridge that destroys so much and offers so little.

The current bridge would be perfectly fine if it had a bit of TLC rather than the years of neglect its been given.

The new bridge doesn't fix the traffic issues and will be at capacity almost as soon as its built, doesn't give the northern towns any significant improvement in flood access, and it destroys the atmosphere and history of Thompson Square and Windsor in the process.

That's an enormous price to pay for not much benefit. The government should hang its head in shame for what its planning, because I'm not even a town planner and can see this is a really bad idea.

Build a bypass and do it properly, do it right.
