I have major concerns about this project and the Government's continued failure to engage in any meaningful community consultation in relation to it. Most disturbing for me is the Government's unwillingness to release the business case to justify this development proposal - when such a large amount of public money is involved, it is absolutely critical that in a democratic society like ours, the public is made fully aware of the full costs/benefits of any project of this scale before Government goes ahead with it.

I agree with many things this Government has done, but I am extremely sceptical of this project and, without release of the business case, will maintain my view that this is all about the big end of town bestowing lucrative contracts onto friends in high and wealthy places - and not about us lowly citizens.
