I would like to formally lodge my submission in opposition of the plans to knock down and rebuild the SFS. I am confident that the huge cost to taxpayers could be much better invested in many other infrastructure programs, not least the refurbishment of old suburban sports grounds across Sydney. At most, the SFS needs repairs and upgrading - knocking it down and rebuilding seems colossally wasteful, and raises the suspicion that vested interests - rather than the public good - are driving the plans.

I strongly urge the NSW government to reconsider these plans.
