I suggest that it be recommended that none of the proposals regarding the Moore Park stadium and associated works should proceed in the absence of any business plan and when there is evidence that the cost of the works will exceed the promised return.

We have already seen evidence in the T Cotter bridge that there is great waste of resources with no obvious benefit happening in Moore Park.

That this government, which claims to be business-friendly should proceed in defiance of the evidence is disgraceful. Equally disgraceful is the lack of consultation with the local community and the lack of consideration of the needs of western Sydney as opposed to eastern

Yours sincerely
