INQUIRY INTO SYDNEY STADIUMS STRATEGY

Name: Mrs Francis Walsh

Date received: 24 May 2018

Please consider the wastage and effect on the environment of building a new stadium to replace an underutilised existing stadium. It is unbelievable that the existing stadium can't be refurbished to comply with modern standards. If a world class stadium is needed in Sydney, it should be built in western Sydney where more facilities are needed and where congestion can be better managed.
