INQUIRY INTO SYDNEY STADIUMS STRATEGY

Name: Ms Sally Hardy

Date received: 24 May 2018

I wish to object to the knock down and rebuilding of the stadium on the edge of the eastern suburbs & the congested city with no regard for the amenity of Moore Park and keeping this amenity for the people of NSW for coming generations.

The fact that the Sydney Cricket Ground Trust has not maintained such an asset is unacceptable and that they expect the public purse to pick up the cost of rebuilding this asset is completely unacceptable.

By not providing adequate public transport and using road solutions to encourage car usage to visit this stadium you are condemning Sydney to a polluted, congested future.

This process is being fast tracked to fit the election cycle and to appease big business & the Sydney Cricket Ground Trust allowing them to create an enlarged "entertainment" precinct in this part of Sydney when it is widely acknowledged that Western Sydney needs these facilities rather than the well heeled Eastern Suburbs.

I object to the lack of meaningful Community communication and the Governments unwillingness to release the business case for this project.

The project endangers the important green areas of the city and will lead to an increase in traffic congestion and pollution which will affect the city as a whole.

The complete disregard for the Community is breath taking.

It is an altogether cynical use of Public land and the public purse to benefit big business and you should be ashamed.
