I object to the destruction of an award winning stadium at Moore Park using public funds that could be more constructively spent on health and education. I also object to the alienation of public land which was given to the state in perpetuity.

Moore Park and Centennial Park are already severely impacted by the light rail project. If there are safety issues at the existing stadium adjustments should be made in a cost effective way.

Green space for recreation is extremely important in the rapidly expanding areas of Redfern, Green Square and Zealand.
