INQUIRY INTO SYDNEY STADIUMS STRATEGY

Name: Ms Catherine Joseph

Date Received: 25 May 2018

I have been using Moore Park on a regular basis for a number of years, particularly Kippax Lake where I have been watching the pair of swans, and their cygnets. This lake has been the swans' habitat for about 10years, and in recent times, habitat for a great number and variety of water birds. The lake is popular with local walkers, workers on lunch breaks, tourists, families, homeless people, passersby, cyclists - the stadiums may attract a greater number of people, but not a greater diversity.

The Kippax Lake area should be maintained not destroyed by ongoing building construction, increased single use mass pedestrian and vehicle traffic and noise and bright lights.
