**INQUIRY INTO PROVISIONS OF THE FORESTRY
LEGISLATION AMENDMENT BILL 2018**

Name: Mrs Susanne Ulyatt

Date Received: 29 May 2018

I am totally opposed to the Forestry Legislation Amendment Bill 2018. I am acutely aware of the lack of habitat for our native wildlife as I have for the past 20 years volunteered my time, emotions and money rehabilitating orphaned and injured native wildlife. The lack of concern by our government is appalling; the destruction of our forests is a disgrace. It is about time our government started to think in the long term. The destruction of our forests is long term, it is forever. The loss of our native fauna is forever. Australia leads the world in extinction of native species, not something to be proud of, it is shameful and it is frowned upon in Australia and overseas. Show some regard and take some responsibility for the future of our beautiful country. Please consider how will you as individuals explain to your grandchildren why our native wildlife is declining, many already extinct, and how you justify that you passed a Forestry Legislation Amendment Bill 2018 allowing the destruction of our already dwindling native forests, when it was blatantly obvious jobs created by this destruction was for the few, the long term outcome was destruction of our fragile environment and our unique wildlife. Stand up for our country, preserve what is left, let future generations be proud of decisions made in the past; it is up to you to ensure a future where what little is left our native forests and native wildlife is preserved, protected and given the respect it is due.
