Proposed changes to the Forestry Legislation Amendment Bill 2018. This legislation, together with the new land clearing laws already passed, will allow unregulated destruction of native forests and the habitat for our wildlife. Once passed the only thing protecting them will be those landowners who choose habitat over profit... and sadly many will chose profit. The laws need to be strengthened to protect remnant bushland, and the biodiversity within them. Too much has already been lost, putting our wildlife and forests at risk of under threat or loss forever in some areas. I strongly oppose the proposed changes to the bill.
