

INQUIRY INTO IMPACT OF THE CBD AND SOUTH EAST LIGHT RAIL PROJECT

Name: Mr George Conomos

Date Received: 8 July 2018

like a lot of public works currently not carefully thought through. They are a waste of public money. this includes waste of new stadiums, bridge over anzac parade that nobody uses, and now they appear to be building another one 200 meters away.. it is a waste of money. public money is misdirected. government should be decentralizing to ease pressure on Sydney. new technology will make light rail obsolete. only yesterday the government thought it was a good idea to remove trams and sell tram tracks extending existing rail services and fast trains would have been far more beneficial. it is not a co-ordinated network. having to use both but and rail is idiotic. It is a very limited solution. awful disfiguring of our city with overhead wires. Undertaking disruptive public works without compensation is unfair and cruel. governments fails to remember financial stress on budget when stamp duty did not flow as it has in recent past.
