

## **INQUIRY INTO IMPACT OF THE CBD AND SOUTH EAST LIGHT RAIL PROJECT**

**Name:** Ms Mora Main

**Date Received:** 8 July 2018

---

Thank you for the opportunity to make an additional Submission to the Inquiry – I have already made one submission. NSW Emissions reductions targets and Transport for NSW sustainability goals. The technologies chosen for this project are heavy duty and overengineered. Loss of many statuesque trees, and construction requiring many thousands of cubic metres of concrete and a huge amount of steel will have incurred high environmental cost. Has the embodied energy of materials been taken into account? The future operational emissions should be separately accounted. Rolling stock manufacture will have its own sustainability issues. The NSW government is targeting zero emissions by 2050. Is this project included in any calculations?

Thank you for considering my Submission.

Yours sincerely, Mora Main   Judges Lane Waverley 2024
