INQUIRY INTO IMPACT OF THE WESTCONNEX PROJECT

Name: James Kevin
Date Received: 13 August 2018

I write to oppose to the West Connex interchange in Rozelle based on its current configuration. In particular, the four exhaust stacks which are unfiltered and concentrated in Rozelle. At an absolute minimum, the stacks should be filtered. The pollution from these stacks is hazardous to the public's health, especially those who live nearby. There is supposed to be community consultation with such infrastructure projects, but for West Connex, there has been no genuine consultation, rather just the Government telling constituents how it is going to be. Also, why are all the stacks located in Rozelle, when technically, they can be placed at either end of the tunnels that they are venting? Alternative sites should be considered for some of the stacks, to help distribute the pollution across Sydney. Thank you for considering this submission. Yours sincerely, James Kevin
