INQUIRY INTO IMPACT OF THE WESTCONNEX PROJECT

Organisation: The Strata Committee of Esplanades and Escarpments, of
Balmain Cove

Date Received: 10 August 2018

I write as Secretary and on behalf of the owners of The Strata Committee of Esplanades and Escarpments, of Balmain Cove, bmsp61172 in Rozelle. This is a densely populated area, with schools, Child Care centres and many residents. This committee has previously made a submission on this matter, to which as yet a response has not been received. The owners hold grave concerns regarding the adverse effects of the proposed WestConnex tunnel in this area. The concerns are: 1 The adverse health effects from toxic gas and small carcinogenic particles in the emissions from the tunnel 2 That it is essential, by reason of the above, that the emissions be filtered 3 That filtering of emissions is world's best practice which we ought be entitled to expect from a responsible government . 4 That the position of the proposed Stack in this area be pinpointed with certainty and that it be substantially reduced in size.
