**INQUIRY INTO CEMETERIES AND CREMATORIA
AMENDMENT REGULATION 2018**

Name: Mrs Trish Robertson

Date Received: 29 August 2018

As a Family History buff I find the thought of losing my family history heritage devastating My ancestors final resting places should be just that final forever not a money making grab to resell plots the thought is disgusting Many of my ancestors going back to early 1800's have no headstones due to financial reasons but for the family members who managed to honour our family members with headstones it's heartbreaking to think they will be just removed like their life had no meaning I find the resale of my loved ones final resting places disgusting we will have no history to hand down just shiny new headstones every 25 years Historic grave sites should be heritage protected The public need to be made aware of this sneaky move the government has put into place Sorry I find this proposal disgusting and if it goes through it will be a huge loss to Australia's history Trish Robertson
