

**INQUIRY INTO CEMETERIES AND CREMATORIA  
AMENDMENT REGULATION 2018**

**Name:** Ms Barbara Callcott

**Date Received:** 30 August 2018

---

I am very upset by this. I am especially upset that the bones will be mixed up and intermeddled so that nobody will know who is who. At the very least the bones should be sampled and tested for DNA & the DNA results put in a public database along with the related identifying information of the cemetery record & death certificate etc. I think about all those people who have been adopted or who have lost track of family members & want to be able to find them. I would like the opportunity to appear before the Committee to support my submission. Thank You.
