INQUIRY INTO IMPACT OF THE WESTCONNEX PROJECT

Name: Ms Bronwyn White

Date Received: 29 August 2018

For me. There is so much. But the main thing about this project is the blatant ignoring of evidence and research from experts and reports that say this project will not provide a long term benefit to the people of Sydney.

I have a real concern around this government not practicing evidence-based decision making and ignoring research by many many experts that told the government not to build Westconnex.

Also, as a researcher, there are future trends that have been ignored. Car ownership is declining with preference toward public transport. Again a fact that has been ignored.

There is no link to the airport (crazy). T

his project has literally ruined peoples lives and invoked mental health problems of those who had their homes taken away with inadequate and below market value compensation. Why do this?

Petty fights over noise abatement for residents.

Why hide the business case...unless you have something to hide? This project has invoked so much distrust.
