INQUIRY INTO IMPACT OF THE WESTCONNEX PROJECT

Name: Ms Kyran Lynch

Date Received: 31 August 2018

West Connex will only succeed in channelling more cars into the Sydney CBD creating a cloud of air pollution in its wake. It is a contradiction of the aims of the government of NSW that a super road should come into the city when high rise living within the city and its surroundings is growing and the need of clean air and space is increasing every day.

The only appropriate use it may have is to move heavy traffic to and from the Port of Sydney .

I believe the road should be open only to very heavy traffic to and from the port and public transport, whether bus or trolley bus, or train or light rail so that Sydney residents can move about their city quickly and efficiently without the stress of driving and traffic delays, and arrive at their destinations relaxed.

The impact of this road on people living within a kilometre of it will be enormous in terms of both air and sound pollution, and the closing of access to local communities to allow this super way to go through them.

Kyran Lynch Kheir El Mardy
