Partially  
Confidential

The dust from the work site in St Peters is ruining my health as I work nearby. Several people within my office (Princes Hwy St Peters) are suffering sinus problems and we are always coughing. The dust makes its way indoors despite us keeping everything shut up. There is not adequate ventilation — only one ventilation structure which is located unsafely close to residents AND a primary school. Who knows what the short, but more importantly long-term, health repercussions this is having on young children.
