**INQUIRY INTO WATER NSW AMENDMENT  
(WARRAGAMBA DAM) BILL 2018**

**Name:** Name suppressed

**Date Received:** 2 October 2018

---

Partially  
Confidential

Over-development has become a cataclysmic problem in N.S.W. The concept of perpetual development, at the cost of environment is unsustainable & to remove society's identity from the natural ecology is folly at the least & life-threatening at the worst! Already the N.S.W government has overwritten environmental protections, destroying koala (& anything else that attempts to live there) habitat & threatening drinking water (Lithgow mine expansion; Wallarah 2) supplies. Will those responsible be able to plausibly deny their culpability when, in the near future, compelled to answer to these crimes against human (& all other) life? You have been put on adequate notice to be considered, under law, informed & thus culpable toward the homes threatened by the Warragamba dam expansion. This World Heritage Listed land, must be protected! The National Parks & Wildlife Act has been assaulted constantly by current state government &, as a progressive society, we shall soon elect government that shall ensure, not only the protection of environment & the democratic processes upon it, but the criminality of actions such as the Berejiklian government; such environmental laws to be implemented retrospectively. Historically criminals have thought themselves safe amongst their temporal co-conspirators. Yet ultimately they are brought to justice, their assets stripped their proceeds of crime (e.g: Developers' lobbying 'donations') exposed & assumed. Do not believe your current criminal actions safe from future repercussions! Your names are on public record, your actions weighed & soon accounted for.
