**INQUIRY INTO WATER NSW AMENDMENT
(WARRAGAMBA DAM) BILL 2018**

Name: Mr Simon Gollan

Date Received: 2 October 2018

The Blue Mountains National Park is one of our last true wilderness areas of NSW. The Blue Mountains is world heritage recognised and listed. It stands as benchmark for biodiversity and tourism. Much of it remains untouched by human interference and must remain in this state at all costs. How could this proposal even be recognised as a feasible project when a landmark such as the Blue Mountains is at stake. It's world heritage status will be lost. As a Blue Mountains resident I strongly oppose this bill. Raising the damn truly represents the governments means to overpopulate the Sydney basin.
