**INQUIRY INTO WATER NSW AMENDMENT
(WARRAGAMBA DAM) BILL 2018**

Name: Mrs Sue Gay
Date Received: 2 October 2018

I have watched to damage to our dams & water ways since the Catchment Authority was dissolved, it is disgusting. When one see MP Stuart Ayres showing the potential for development on the flood plains, this paints a clearer picture of why.this is needed. Developer benefit to sustain the mass migration we are seeing in this state & country all so unsustainable, not to mention the damage to the environment this will cause. Have National Parks ever been held accountable for collapsing the old silver tailing dams around Yerrandrie, thus creating the algae bloom on the Warragamba Catchment. NO is the answer. Lets protect and manage properly what we have that is slowly been eroded. I object to the raising of the Dam Wall.
