**INQUIRY INTO WATER NSW AMENDMENT  
(WARRAGAMBA DAM) BILL 2018**

**Name:** Mr Roger Grealy

**Date Received:** 3 October 2018

---

Dear Sir/ Madam , My family and I are strongly against the idea of raising the height of the wall of Warragamba Dam.If the wall is raised there will be many thousands of hectares of forest destroyed and millions of individual animals killed. Now that NSW has a desalination plant there is no requirement for the extra water that might be stored with a higher dam wall. If we do have inundation there will still come a time that water has to be released and large areas will be flooded. In a time of climate change we are having more extreme weather events which includes bigger and more extensive floods. Please leave the beautiful bushland and all the living things in peace and do not raise the height of the wall. Sincerely Roger Grealy
