**INQUIRY INTO WATER NSW AMENDMENT
(WARRAGAMBA DAM) BILL 2018**

Name: Ms Fiona Radford

Date Received: 3 October 2018

To whom it may concern, I would like to lodge my extreme concern about the proposed plan. As usual, it seems as though the government is rushing in to this project without giving the environment or Indigenous sites enough consideration. At this stage of our history, both of these aspects should be at the forefront of any government action, instead of continually taking a backseat. Do your homework and do it properly. If there are serious concerns about the damage this could do, address them and rectify the plan. I sincerely hope any action is delayed whilst serious research and revision is carried out. What has been done so far is not sufficient.
