## Proposed Raising of the Warragamba Dam Wall

As a citizen of New South Wales I would like to voice my concerns regarding the proposed raising of the Warragamba Dam Wall, the concerns being:

- The destruction of the wild rivers up stream due to the increase in water.
- The destruction of animal habitats and fauna, especially fauna that are threatened and only found in this region of New South Wales - Australia.
- The destruction of flora habitat and especially fauna only found in this region of New South Wales - Australia.
- The destruction of landscapes and waterways for endangered insects only found in this region of New South Wales - Australia.
- The destruction of Australian Indigenous Peoples sacred sites
- The destruction of swap lands and wet lands due to the increase in water.
- The disregarding to an exciting World Heritage Listing ?????
- Has there been a proper flood investigation/inquiry 'down steam' that ensures no flooding of the new and proposed buildings-housing?

Thank You

Nick
