The proposal for this dam is an abhorrent attack on our irreplaceable wild rivers and will further position Australia as a leading environmental vandal. Before we flood the Blue Mountains, perhaps we need to reconsider flooding the country with more people? The immigration Ponzi scheme enabled by this Liberal Government at both Federal and State levels is leading to unsustainable population explosions that are tipping the balance of our relatively delicate eastern coast environment. Six year old study visas for the Chinese? Aged parent visas for migrants? Stop it ~ we need to understand how many people our current water and agricultural sectors can sustain into a drought riddled future and work with that.

And such a short time for submissions on this HUGE project is a disgrace.
