Inquiry into the impact of the WestConnex Project

Dear Committee Members

We would like to ask the Committee to consider the attached email we received yesterday in relation to a complaint we made about the WestConnex construction work causing our home to vibrate.

Why it is a necessary addition to the submission

As you will see from our submission, one of the issues we raised is the dismissive manner in which we are being treated by the WestConnex Community Relations team, how close to the construction our home is and how little consideration we have been given in relation to the impact of the construction work has on our home lives.

Brief comments about this email

You will see that I am pointing out my concern and distressed over my home vibrating by the impact of the construction work and you will see the response provided by the Community Relations Team is essentially to not only dismiss our distress but add to it by advising that the vibration is going to get worse.

I would be more than prepared to speak to directly to the Committee about any of the issues we have raised during any one of the schedule hearings or at any other time.

Thank you again for taking the time to consider our submission.

Yours sincerely

Kate Cotis
