**INQUIRY INTO USE OF BATTERY CAGES FOR HENS IN
THE EGG PRODUCTION INDUSTRY**

Name: Olivia Yde-Andersen

Date Received: 28 June 2019

I hope I don't need to write to much for you to understand how wrong it is to lock hens in small cages their entire lives so they can lay eggs on our behalf. Can you imagine being born into a life where you a stuffed into a wire cage with 3, 4, or 5 other hens in that same cage, never seeing sunlight and never knowing freedom. We have created a life of hell for animals who live in factory farms and this needs to end. Our karma will come back around no matter what for what we have done to animals, but I hope we can move forward and create a kinder world for all.
