**INQUIRY INTO USE OF BATTERY CAGES FOR HENS IN
THE EGG PRODUCTION INDUSTRY**

Name: Mrs Natasha Harley

Date Received: 13 July 2019

As an animal lover I have experience rescuing Chickens and seeing them in there own surrounding free from cages. My Chook girls have the whole of backyard to scratch around the lawn, see the sun, have dust baths, eat health with corn, veggie crumble, wheat, they love watermelon on hot days, spaghetti and rice. They are all healthy happy hens and when the hens stop laying they can retire without any harm for the rest of there lives free. Which all hens should be, out of those cruel cages and to experience life with compassion and respect. All caged hens need to out of those cages to experience being free and happy, like my 6 girls who have names, when I call them they run towards me. Put a end to battery caged hens to happy healthy Free Range Hens.
