INQUIRY INTO URANIUM MINING AND NUCLEAR FACILITIES (PROHIBITIONS) REPEAL BILL 2019

Name: Ms Dereka Ogden

Date Received: 7 July 2019

1. Nuclear has no place in any part of our industrial landscape except for medical.
2. The risks are far too great as we have seen in other countries and
3. the terrible price that those countries have paid when things go wrong in terms of human and environmental suffering and financial loss.
4. It is not necessary to have nuclear power with renewables getting cheaper all the time and alternative methods coming shortly such as hydrogen.
5. The waste is difficult to dispose of and lasts far too long.
6. The power plants take too long to build.

All of this is known and I consider these reasons are quite sufficient to stop any new nuclear facilities being built.

Dereka Ogden
