Music festivals are an experience to connect with one another. Music festivals are one of the only places in earth where religion, language and anxieties of friendships are broken down. Music festivals are an umbrella which accept all race and all people for who they are. Killing music festivals will kill a special place where people from all backgrounds come to connect. Not to mention people's jobs and communities which rely on this money. I'm an architect who designs music stages a job I wish to do for the rest of my life although I fear I will now need to move state or country to do so.
