hi there

I'm on the pension, post-traumatic stress from the army  
I'm full of cancer, every now and then something pops inside of me and I bleed  
in the last 10 years I just made it to mona 3 times, fainting at the reception.  
they looked after me... : )  
I see my condition as a contribution to world peace  
next time I bleed I die

I had good support mentally and physically, it stopped 2 years ago  
wherever I go now I get rejected, this makes things worse, better to do nothing  
you are right about privatising!

I used to be proud of our health system  
maybe this helps in some way, contact me if you like

happy Australia day  
Marc
