

**INQUIRY INTO URANIUM MINING AND NUCLEAR
FACILITIES (PROHIBITIONS) REPEAL BILL 2019**

Name: Name suppressed

Date Received: 16 July 2019

Partially
Confidential

Attached is a letter written by Friends of the Earth and I agree with everything that is written, we cannot allow Nuclear Power Stations to be built, it is not feasible and it is dangerous. We have no means of disposing of the waste that will stay active for thousands of years, and we do not need them when we have much cheaper and safer alternatives to produce power. yours sincerely caring citizen of Australia
