**INQUIRY INTO KOALA POPULATIONS AND HABITAT IN
NEW SOUTH WALES**

Name: Asha Singham

Date Received: 8 July 2019

I am extremely concerned about koalas becoming extinct. Koala habitats need to be protected and not opened up for any development, farming or mining.

With soaring temperatures due to climate change, more needs to be done to stop further greenhouse gases entering the atmosphere. The koala nor the human can survive the increased temperatures predicted if human society does not rethink its fossil fuel dependence.
