**INQUIRY INTO KOALA POPULATIONS AND HABITAT IN
NEW SOUTH WALES**

Name: Ms Linda Hall

Date Received: 8 July 2019

I don't know how your system works, so I have no 'file', just a heart (and mind) felt plea. As individuals, as human beings with a conscience, compassion, even a sense of logic, surely you can look beyond money, influence, power and basically being the stereotypical MP and save your country and its iconic wildlife. While you are at it you can help save this planet for the next generation.

I can't believe what I am constantly hearing from Australia. You seem determined to destroy your country. Draining your rivers, cutting down your life-sustaining trees (creating deserts, fires, floods), brutalising your domestic animals by cramming them into ships and sending them to 'fates worse than death', wiping out your wildlife with the disgusting 1080. Now you take the home of these beautiful, gentle, iconic creature.

Plant trees as it has been clearly pointed out to the world that this is possibly our only salvation. Value your wildlife.....all of it.
