**INQUIRY INTO KOALA POPULATIONS AND HABITAT IN  
NEW SOUTH WALES**

**Name:** Mrs Maïke Coates

**Date Received:** 8 July 2019

---

Koalas living in NSW are in dire peril.

Their natural habitats have been decimated and this needs to end now before it is too late and they are extinct.

Re-instating their natural habitats and protecting the last existing ones needs to be prioritised.

Shame on us if this is not done and a massive loss is not prevented.
