

**Submission  
No 39**

**INQUIRY INTO KOALA POPULATIONS AND HABITAT IN  
NEW SOUTH WALES**

**Name:** Ms Tracey Burchall

**Date Received:** 18 July 2019

---

It is very hard to fathom how intelligent people cannot plan for an ethical and sustainable future for all flora and fauna. We need wisdom and environmentally responsible decision making not just for particular species but for all species. We need to remember that our job is to coexist and not to just dominate because we can. We have become environmental bullies of sorts without the insight to recognise what we do or worse we just don't care. Popular or unpopular we need to make wise decisions.
