## INQUIRY INTO KOALA POPULATIONS AND HABITAT IN NEW SOUTH WALES

**Name:** Ms Joanne Warner

**Date Received:** 18 July 2019

---

I'm writhing this to show my support for the koalas in NSW. Man is taking it's toll on thier populations in many ways. Mainly loss of thier homes. I don't care for the idea of no koalas within 30 years. The very sound of that is shocking. Australia has to stand up for our most unquine wildlife in fact all creatures great and small. Koalas are 1 of our nation's most identifiable nation emblem along with the our other amazing species we have, we must do everything in our power to help them survive at any cost. Man's greed has to end as it's not our place to play God. I realize we are growing bigger every day but not at the expense of our animals. With sensible land management and practices I'm sure we can all live happy ever after, I want to see them in the wild not only in zoos. I would appreciate you do everything possible to assist our little furry legends. Thank you.
