I am totally against battery cages, battery methods for the production of eggs and keeping chickens in this type of environment. It is cruel and shows a complete lack of moral integrity and compassion for the chickens that are used in this way. I have boycotted caged produced eggs for my whole adult life. Please ensure that the government addresses this issue in terms of current community expectations for an ethical food industry where basic animal welfare standards are humane. Stop battery farming, stop the production of eggs and chicken in battery cages
