**INQUIRY INTO KOALA POPULATIONS AND HABITAT IN
NEW SOUTH WALES**

Name: Name suppressed

Date Received: 26 July 2019

Partially
Confidential

I live in Queensland but we have similar threats to koalas through forest logging and urban growth.

If we do not take protective care measures, soon there will not be any habitats left in which the koalas can live and breed disease free, and without impact from climate change, fires and drought.

Please do not log the pristine areas of the Kalang headwaters. These may become the last refuge of the endangered national icon koala
