**INQUIRY INTO KOALA POPULATIONS AND HABITAT IN  
NEW SOUTH WALES**

**Name:** Ms Lynette Sinclair

**Date Received:** 27 July 2019

---

Please accept this as my submission into koala habitat and population. Surely this problem has fairly straightforward solutions:- 1. Stop logging our native forests that provide the habitat for koalas and other native species. 2. Construct fencing and wildlife corridors across major highways and motorways to prevent native animals such as the koala from straying onto our roads and being killed. 3. Take action on the climate change crisis and plant more trees, keep fossil fuels in the ground and transition to renewable energy urgently. It is unthinkable that we may lose this iconic species because of greed and ignorance on the part of the government and its corporate cronies.
