**INQUIRY INTO USE OF BATTERY CAGES FOR HENS IN
THE EGG PRODUCTION INDUSTRY**

Name: Dr Denise Russell

Date Received: 24 July 2019

Dear Committee members,

I am appalled by the practice of keeping chickens in cages, without access to their natural environment. It is cruel beyond belief.

I know that eggs are a healthy food source for humans but I deplore the fact that most of us have not choice but to eat those from battery cages.

Please do your utmost to stop this barbaric practice.

Yours,

Dr. Denise Russell
