

**Submission  
No 207**

**INQUIRY INTO KOALA POPULATIONS AND HABITAT IN  
NEW SOUTH WALES**

**Name:** Ms Lucia Jadronova

**Date Received:** 1 August 2019

---

Dear Parliament of NSW,

Please stop the logging and further extinction of Australian Native Wildlife. We are a developed country, therefore, we should be setting an example for other countries about the way we treat the world around us. Koalas have been declared functionally extinct. The Australian animal icon recognisable around the world has only a few years left if we don't ACT NOW. Australia is ranking as number one in the extinction of fauna and flora amongst developed countries and it seems that we are still not concerned! The thread is real and the LOGGING MUST STOP NOW. Please let's think of the wellbeing of the next generations of animals and humans when making decisions.
