**INQUIRY INTO PROPOSAL TO RAISE THE
WARRAGAMBA DAM WALL**

Name: Ms Jennifer Cuthbertson

Date Received: 15 August 2019

Re Inquiry Into Raising of Warragamba Dam Wall

The proposal to raise the Warragamba Dam wall is completely flawed.

1. It would destroy sensitive biospheres at a time when we are facing extreme endangerment to our priceless and unique flora and fauna, as is well documented
2. It is not supported by local Indigenous groups due to the threat to their heritage
3. It endangers our precious World Heritage listing due to the scientifically stated risks

This proposal seems only to benefit developers, a group currently under scrutiny for serious issues that are far from resolved and those pushing for short term gain at any expense. In other words the proposal is against any intelligent planning and our family is totally opposed to it.
