

**INQUIRY INTO PROPOSAL TO RAISE THE
WARRAGAMBA DAM WALL**

Name: Name suppressed

Date Received: 17 August 2019

Partially
Confidential

Raising the wall will do nothing for increased water supply if we have no substantial rainfalls..which is the BOM prediction for the future therefore a waste of taxpayers money...on the minuscule chance that it would increase you have the devastation of indigenous heritage with both flora and fauna gone forever..losing habitat for so many animals....are we to leave nothing for future generations? Please consider other alternatives to increasing Sydney' water supply...(which already reaps it's water from Shoalhaven and Southern highland dams...what about the millions you sunk into the Desalination plant that is mothballed for how many years..? Perhaps rescuing that would make a better alternative!
