**INQUIRY INTO PROPOSAL TO RAISE THE
WARRAGAMBA DAM WALL**

Name: Mrs Vandra Mellers

Date Received: 30 August 2019

I am writing this with concern of the raising the wall of Waragamba Dam, and the impact this raising will have on the surrounding countryside. This concern is also about the possibility of building on the floodplain, and the dangers this may bring to people living in this area.

I would rather see the government put the monies to be spent on the raising of the dam, on recycling water that is currently flushed down the drain and out to sea.

There has to be a better way of water management than raising the dam wall. Please look at other options.
