**INQUIRY INTO PROPOSAL TO RAISE THE
WARRAGAMBA DAM WALL**

Name: Mr Geoff Walker

Date Received: 30 August 2019

1. raising warragambah dam is designed to support developers. developers want to say to buyers, "you are protected".
2. raising warragambah dam is designed to support insurers. insurers want to charge new home buyers higher premiums cos they're buying houses in a high-risk zone
3. warragambah will not control 60% of the floodwaters. so 60% of waters will flood the homes of the buyers. there is less risk/life loss/etc but still more than is acceptable in a democracy.

thus nsw govt in power may be held legally accountable for failing to look after its citizens

yours in anticipation of future schadenfreude, geoff
